

Unified pair correlation and Brody spacing statistics Manufactured surfaces × prime embeddings × quantum-chaos reference ensembles

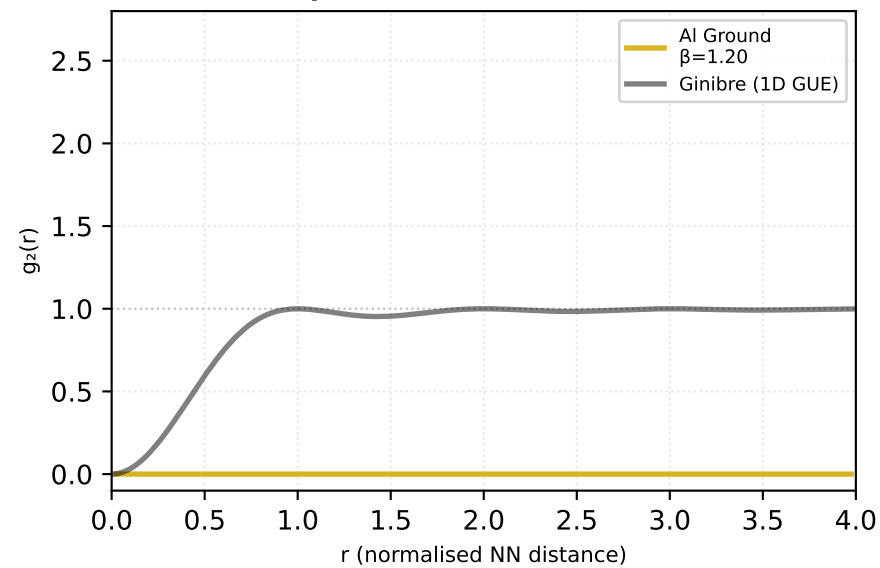

(a) Super-GUE ($\beta > 2$)

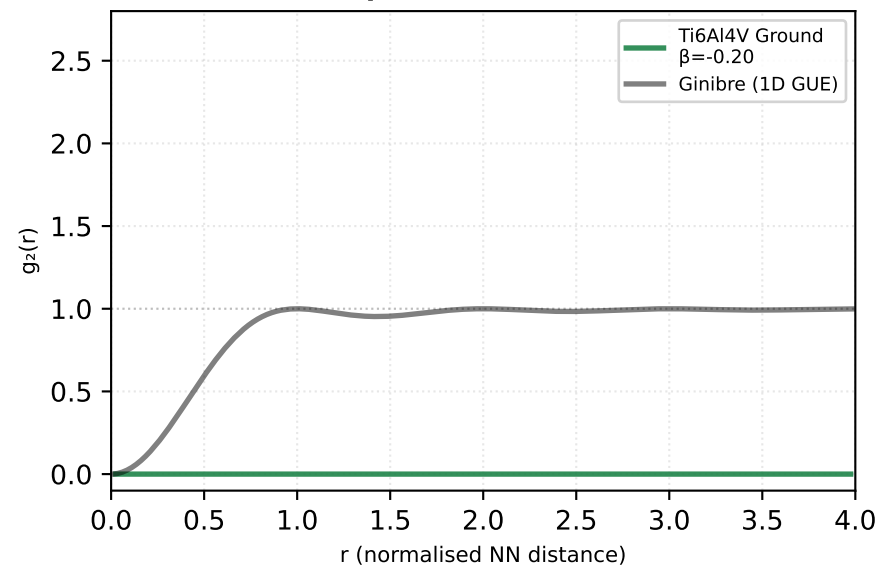

(b) GUE-like ($\beta \approx 2$)

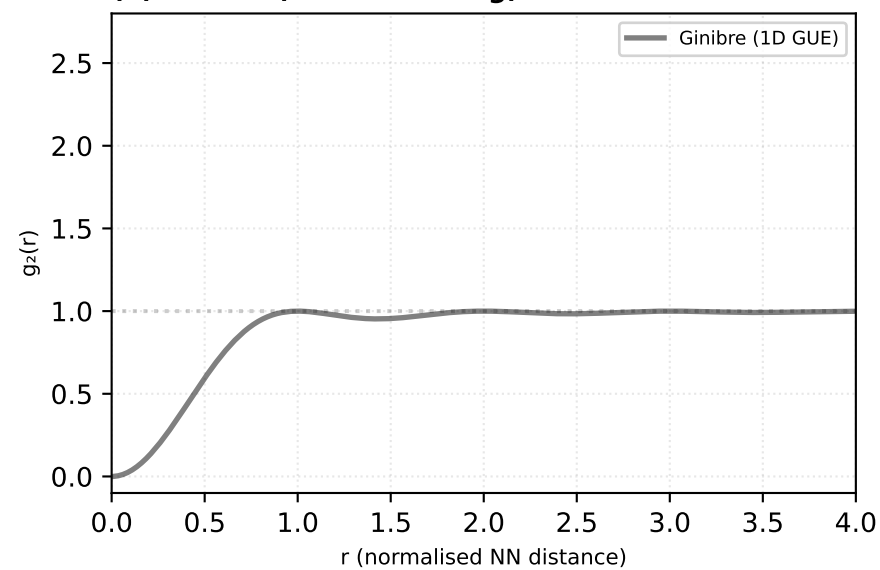

(c) GOE-like ($\beta \approx 1$)

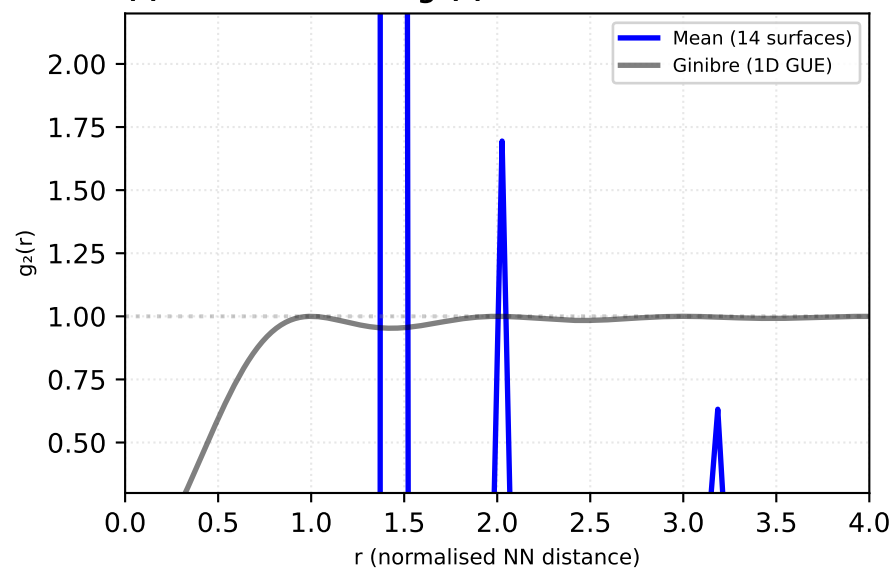

(d) Poisson-like ($\beta \approx 0$)

(e) Primes (2D embedding)

(f) Ensemble mean $g_2(r)$

(g) β across domains
